

DES No. 7/2014

Government of Karnataka

**REPORT ON THE STATUS OF
ESTIMATION OF AGRICULTURE PRODUCTION IN
KARNATAKA
(State Samples)**

2011-12

**Directorate of Economics & Statistics
Bangalore
2014**

Preface

The Improvement of Crop Statistics (ICS) scheme aims at locating the deficiencies in the system of collection of data on crop area and also in conduct of crop cutting experiments through the joint efforts of Central and State authorities. Sample check on the work of area enumeration and crop cutting experiments are carried out by the supervisory staff of both State Agricultural Statistics Authority (SASA) and National Sample Survey Organisation (NSSO) on equal matching basis. In Karnataka, the scheme is in operation since the Rabi season of 1973-74.

2. The sample check on area enumeration and conduct of crop cutting experiments are being carried out by the technical personnel of the State (SASA) and the Centre (NSSO) independently, on different villages selected under the survey. The scheme also envisages exchange of data between the two agencies that would facilitate sharing of the experiences, and untie the reasons for the lapses.

3. The Report on the Status of Estimation of Agriculture Production in Karnataka, 2011-12 deals with the findings of the sample checks conducted under improvement of crop statistics on enumeration of crop area and estimation of yield in respect of State samples in Karnataka during Kharif, Rabi and Summer seasons of 2011-12. The report reveals a number of deficiencies in writing of the Pahani (RTC) by the Village Accountants and in conduct of crop cutting experiments by the primary workers i.e., Village Accountants and Agricultural Assistants, Gram Panchayath Secretaries. Such deficiencies will have serious impact on the quality and reliability of the estimates of areas and yield rates of crops. It is hoped that these findings will be taken note of by all the field level functionaries and evince sincere efforts to overcome such deficiencies in future.

4. This report is prepared in the Agricultural Statistics Division of the Directorate of Economics and Statistics. The constructive suggestions if any for the improvement of the scheme are most welcome.

REPORT ON THE STATUS OF ESTIMATION OF AGRICULTURAL PRODUCTION IN KARNATAKA 2011-12

1. INTRODUCTION:

1.1. The scheme for Improvement of Crop Statistics has been in implementation in Karnataka since 1973-74. The main objective of the scheme is to improve the quality and reliability of crop area and yield statistics through sample checks on area enumeration and crop cutting experiments. 300 villages each are selected randomly for supervision by state and central agencies out of the TRS villages selected. 900 crop cutting experiments are also selected for supervision for each agencies separately every year.

1.2. The programme of work under this scheme consists of supervision on:

- i) Area enumeration carried out by the Village Accountants in the selected villages.
- ii) Crop abstracts prepared on the basis of RTC.
- iii) Crop cutting experiments conducted by the staff of Agriculture, Revenue, RDPR and Horticulture departments.

1.3 This report deals with the findings of the state sample checks conducted under the scheme on area enumeration and on conduct of crop cutting experiments during the agriculture year 2011-12. They are presented along with previous year findings separately for kharif, rabi and summer seasons. The findings of the scheme are as follows:

2. DETAILS ON ENUMERATION OF CROP AREA STATISTICS:

2.1. Statistics on crop area and land utilisation are the extracts of the RTC recorded by the Village Accountants. The procedure of collection of area statistics is complete enumeration of the crop area of the villages. The Village Accountants record the crop area survey /sub- survey number wise of all the villages by field visit in all the three seasons in a year.

2.2 The Timely Reporting Scheme (TRS) is being implemented in the State since 1971-72 to streamline the system of reporting the crop area figures. As per this scheme each state is required to estimate, the crop sown area soon after the completion of the season, on the basis of complete enumeration in 20% of villages selected randomly every year. Sample checks on enumeration of area were also carried out separately each in 300 TRS villages for the state and central samples during the agriculture year 2011-12. Sample checks on aggregations of Area were also conducted in case of state samples as per the guidelines under ICS.

2.3. Response under sample checks on area enumeration: (A.S.1.0)

The following table shows the receipt position of filled-in-schedules during kharif, rabi and summer seasons of **2011-12** with that of the previous year.

Table - 1

Receipt position of schedules under sample check on area enumeration during 2010-11 and 2011-12.

Year	No. of villages selected for each season	Kharif				Rabi				Summer			
		Total	%	By cut off date	%	Total	%	By cut off date	%	Total	%	By cut off date	%
2010-11	300	300	100	278	93	300	100	257	86	300	100	262	87
2011-12	300	300	100	260	87	300	100	283	94	300	100	259	86

The receipt position of filled in schedules by cut off date was 260 (87%), 283 (94%) and 259 (86%) during kharif, rabi and summer seasons of 2011-12 respectively. The respective figures during 2010-11 were 278 (93%), 257 (86%) and 262 (87%). The receipt position of schedules by cut off date has not improved during the year under review.

2.4. Availability and utility of village maps:

The information on the availability and utility of village maps as reported by the supervisors is given in Table - 2.

Table - 2
Availability of village maps

Number of years since available	2010-11		2011-12	
	No.	%	No.	%
1	0	0	0	0
2 – 5	0	0	2	1
6 – 10	7	2	2	1
11 – 20	13	4	12	4
More than 20 years	244	82	238	79
Maps not available	36	12	46	15
Information not available	0	0	0	0
	300	100	300	100

The maps were available with the primary workers in case of 85% of villages in 2011-12. Out of the available ones, about 79% of villages were found supplied more than 20 years back. There is a need for regular supply and updation of maps for better identification of survey numbers for area enumeration.

2.5 Work load per Village Accountant:

Details about the workload per Village Accountant are given in the following table.

Table - 3
Workload per Village Accountant

Year	Average no. of villages per Village Accountant	Average No. of TRS villages per village Accountant	Average No. of Survey / sub-survey nos. per village	Average Geographical area per village (in hects)
1	2	3	4	5
2010-11	5	1	619	793
2011-12	5	1	865	933

It is seen from the above table that, the average workload per Village Accountant is 5 villages and average survey/sub survey numbers per village is 865 survey/sub survey numbers and 933 hectares geographical area.

2.6 The frequency distribution of sample villages according to survey / sub-survey numbers and geographical area are given in Table – 4.

Table - 4
Distribution of sample villages according to survey / sub-survey nos, & geographical area for the year 2011-12.

Sl. No.	Class interval	Survey / Sub-Survey Numbers		Geographical area (in hects)	
		No. of villages	Percentage	No. of Villages	percentage
1	2	3	4	5	6
1	1 – 200	67	22	39	13
2	201 – 400	80	27	65	21
3	401 – 600	52	17	44	15
4	601 – 800	23	8	27	9
5	801 – 1000	19	6	24	8
6	1001 – 5000	59	20	101	34
7	5001 & above	0	-	0	0
8	Not reported	-	-	-	-
9	Total	300	100	300	100

It is clear from the above table that, about 20% of the sample villages contain more than 1000 survey/sub-survey numbers and 34% of the sample villages come under the category of having more than 1000 hectares of geographical area.

2.7 Timeliness in completion of area enumeration under Timely Reporting Scheme:

Under Timely Reporting Scheme (TRS) Village Accountants are required to complete the area enumeration for kharif, rabi & summer seasons during September, January and April months respectively.

The details of completion of area enumeration in the TRS villages during 2011-12 are shown in Annexure- 1 and also in chart-I.

The sample checks planned are to be carried out within a month of the due date of area enumeration in each season. It is seen from the Annexure - 1 that in 87%, 94% and 86% of the villages in kharif, rabi and summer seasons respectively have been enumerated by the Village Accountants in time. There was no

improvement in completion of area enumeration within the due date during all seasons except during Rabi season as compared to previous year. The sample check on area enumeration reveals that in about all the cases the latest format of area enumeration was used and the records were kept in the regular forms.

2.8 Submission of TRS crop abstracts:

The detailed information on submission of TRS crop abstracts as observed during sample checks are indicated in Annexure – 2. Village Accountants were expected to submit the TRS crop abstracts after completion of area enumeration by 12th of September, January and April for kharif, rabi and summer seasons respectively. The sample checks reveal that, 87% of TRS crop abstracts were submitted for kharif season, 89% for rabi season and 95% for summer season within the due date after completing girdwari. The results of the sample checks during 2011-12 as compared with 2010-11 reveals that, there was slightly increase in timely submission of TRS crop abstracts during Rabi and summer seasons. In about all the villages, duplicate copies of the TRS crop abstracts were maintained by the Village Accountants in all the three seasons.

2.9. Discrepancies in recording crops and its area:

Attempts were made to compare the crop area recorded in the RTC, by the Village Accountants with that of corresponding entries made by the Supervisors in sample check reports. The types of discrepancies observed are as follows:

- i) e1: Crop reported by the Supervisor but not reported by the Village Accountant.
- ii) e2: Crop reported by the Village Accountant but not reported by the Supervisor.
- iii) e3: Area reported under a crop by the Supervisor and Village Accountant differed.

The types of discrepancies noticed are given in Table – 5.

Table – 5
Discrepancies in recording of crops and crop areas during 2011-12

Sl. No.	Season / Crop	No. of Survey / Sub – survey numbers where discrepancies observed				Total (4+5+6)
		Total	Crop Reported by Supervisor but not by VA (e ₁)	Crop Reported by VA but not by Supervisor (e ₂)	Crop area Reported by Supervisor & VA but differed (e ₃)	
1	2	3	4	5	6	7
I	KHARIF					
1	Paddy	565	0	5	6	11
2	Jowar	160	0	3	4	7
3	Bajra	210	0	6	5	11
4	Ragi	172	0	0	4	4
5	Tur	424	0	3	13	16
6	Groundnut	153	0	0	1	1
7	Sugarcane	197	0	2	4	6
8	Cotton	198	0	0	3	3
9	Maize	554	0	5	10	15
10	Sunflower	99	0	1	4	5
11	Greengram	165	0	4	4	8
12	Other crops	3328	0	33	97	130
	Total	6225	0	62	155	217
		(100)	(0)	(1)	(2)	(3)
II	RABI					
1	Jowar	506	0	3	19	22
2	Wheat	73	0	4	0	4
3	Bengal gram	135	0	1	1	2
4	Sunflower	63	0	0	1	1
5	Other crops	5089	0	20	88	108
	Total	5866	0	28	109	137
		(100)	(0)	(1)	(2)	(2)
III	SUMMER					
1	Paddy	179	0	0	0	0
2	Groundnut	34	0	0	1	1
3	Other crops	5390	0	0	30	30
	Total	5603	0	0	31	31
		(100)	(0)	(0)	(1)	(1)

Note: (i) Figures in brackets indicates percentage to the total (ii) VA – Village Accountant

It is seen from the above table that the discrepancies were reported in 3% of survey numbers during kharif, 2% during rabi and 1% during summer seasons respectively. Thus, in most of the survey numbers the reporting was correct. Analysis by type of errors noticed, are as follows:

- (i) (e1): Crops not reported by the Village Accountant but reported by Supervisor. This type of error was not observed in any of the three seasons of the year.
- (ii) (e2): Crops reported by the Village Accountant but not reported by Supervisor was 1% during kharif and Rabi seasons.
- (iii) (e3): Cropped area reported by the Village Accountant and Supervisor differed to the extent of 2% for kharif, 2% for rabi and 1% during summer seasons respectively. Districtwise and cropwise details are given in Annexure – 3 and depicted in chart-III.

2.10. Extent of discrepancies in recording of area under the crop:

The extent of discrepancies noticed in recording cropped area are given in the following table.

Table – 6
Discrepancies in recording crop and its area during the years
2010-11 & 2011-12

(Area in Hectares)

Sl. No.	Season/ Crop	2010-11			2011-12		
		Area reported by the Supervisor (a)	Area reported by the Village Accountant (b)	Percentage of over or under reporting of area by Village Accountant	Area reported by the Supervi sor (a)	Area reported by the Village Accountant (b)	Percentage of over or under reporting of area by the Village Accountant
1	2	3	4	5	6	7	8
I KHARIF							
1	Paddy	661.70	662.21	0.08	508.23	513.75	1.08
2	Jowar	77.89	77.89	0	60.37	64.55	6.92
3	Bajra	97.50	97.50	0	203.74	206.75	1.48
4	Ragi	84.28	84.28	0	88.24	88.24	0.00
5	Tur	570.13	574.59	0.78	474.93	470.48	-0.94
6	Groundnut	146.82	146.82	0	211.83	211.83	0.00
7	Sugarcane	141.16	143.24	1.47	177.04	187.80	6.08
8	Cotton	204.9	204.9	0	200.71	201.69	0.49
9	Maize	606.99	607.82	0.14	544.74	551.91	1.32
10	Sunflower	32.86	34.22	4.14	127.62	127.73	0.09
11	Greengram	166.93	168.29	0.81	164.16	165.90	1.06
12	Other crops	770.01	749.46	-2.67	682.85	670.90	-1.75
II RABI							
1	Jowar	634.11	634.11	0	569.62	573.91	0.75
2	Wheat	66.58	66.58	0	55.47	58.93	6.24
3	Bengal gram	124.14	124.98	0.68	150.66	152.40	1.15
4	Sunflower	81.78	81.78	0	89.71	89.71	0.00
5	Other crops	495.61	487.78	-1.58	584.44	572.12	-2.11
III SUMMER							
1	Paddy	355.84	355.84	0	133.75	133.75	0.00
2	Groundnut	28.19	29.19	3.55	52.31	51.38	-1.78
3	Other crops	520.85	500.85	-3.84	486.78	455.20	-6.49

It is seen from the table that, the Village Accountants have invariably over reported the area for many crops in all the seasons. Over reporting ranges from 0.04% for sunflower and to 6.92% for jowar crop during Kharif season and over reported for wheat, bengalgram and jowar crops during Rabi and under reported of groundnut crop

during Summer season. Districtwise and cropwise extent of discrepancies are given in Annexure- 4.

2.11. Extent of discrepancies in recording crop area under irrigation:

Sample check programme also includes collection of information on irrigation particulars and the inputs used like seeds and other items of the cropped area. The extent of discrepancies noticed in recording cropped area pertaining to irrigation particulars are given in Table- 7.

Table - 7

Extent of discrepancies noticed in recording area pertaining to irrigation particulars for the years 2010-11 & 2011-12

(observed in sample clusters)				(Area in Hectares)		
2010-11				2011-12

Other crops	252.36	241.74	-4.21	237.76	230.32	-3.13
Total	1208.94	1192.02	-4.10	1214.09	1217.24	0.26
RABI						
Jowar	21.3	21.3	0.00	16.48	16.48	0.00
Wheat	36.6	36.6	0.00	29.33	28.13	-4.09
Bengalgram	19.04	19.38	1.79	33.31	34.46	3.45
Sunflower	22.62	22.62	0.00	18.18	18.18	0.00
Othercrops	253.1	252.38	-0.28	322.83	322.93	0.03
Total	352.66	352.28	-0.11	420.13	420.18	0.01

SUMMER						
Paddy	355.84	355.84	0.00	133.75	133.75	0.00
Groundnut	28.19	29.19	3.55	52.31	51.38	-1.78
Othercrops	195.90	188.94	-3.55	286.69	288.29	0.56
Total	579.93	573.97	-1.03	472.75	473.42	0.14

It is seen from the above table that, the Village Accountants have over reported the irrigated area of Paddy, Jowar, Ragi and Sugarcane. Under reported the area of Bajra, Tur and Maize crop during Kharif season. Over reported the area of Bengalgram and under reported the area of wheat during Rabi season. Over reported irrigated crop area varies from 0.83% in respect of Paddy crop to 30.15% in respect of Jowar during Kharif. Districtwise and cropwise extent of discrepancies in recording irrigation particulars are given in Annexure – 5.

Details of distribution of survey numbers where in discrepancies noticed pertaining to irrigation particulars are given in Table - 8.

Table – 8

		(100)				(100)	(0)	(100)

I=Irrigated UI=Unirrigated
NR=Not reported

It is seen from Table – 8 that, the irrigation details recorded by Village Accountant and as observed by the Supervisor tallied in about 98% of survey numbers in kharif, 99% in rabi, and 100% in summer seasons respectively. Differences observed in the cases of Tur, Bajra, Jowar, Paddy, Maize, Greengram, and Sunflower crops in kharif season, Jowar, Wheat, Bengalgram crop in Rabi season and Groundnut in summer season are respectively high.

2.12. Discrepancies noticed in recording crop area of high yielding variety crops:

Discrepancy in reporting high yielding varieties of crops is given in Table - 9.

Table – 9

Discrepancies noticed in recording area under high yielding varieties during the Year 2010-11 & 2011-12 (observed in sample clusters)

Sl. No.	Season/ Crop	2010-11			2011-12			(Area in Hectares)

6.	Groundnut	89.77	87.84	-2.15	166.79	166.79	0.00	
7.	Sugarcane	138.63	140.71	1.50	170.48	181.43	6.42	
8.	Cotton	204.46	204.9	0.22	193.36	194.49	0.58	
9.	Maize	607.45	607.73	0.05	550.26	552.93	0.49	
10.	Sunflower	32.86	34.22	4.14	127.62	127.73	0.09	
11.	Greengram	90.69	92.05	1.50	61.69	64.07	3.86	
12.	Other crops	287.71	270.17	-6.10	347.93	320.85	-7.78	
II.	RABI							
1.	Jowar	590.01	590.01	0.00	499.91	500.53	0.12	
2.	Wheat	48.42	48.42	0.00	38.67	37.47	-3.10	
3.	Bengal gram	75.13	75.97	1.12	97.56	97.56	0.00	
4.	Sunflower	79.09	79.09	0.00	86.42	85.46	-1.11	
5.	Other crops	240.89	240.14	-0.31	313.13	316.62	1.11	

III.	SUMMER						
1.	Paddy	355.28	355.28	0.00	133.75	133.75	0.00
2.	Groundnut	25.99	26.99	3.85	47.08	46.15	-1.98
3.	Other crops	142.89	137.49	-3.78	260.91	245.10	-6.06

It is seen from the above table that the Village Accountants have over reported area for Paddy, Jowar, Bajra, Sugarcane, Cotton, Maize and Greengram during Kharif season under high-yielding variety. Over reporting of area varies from 0.09% for sunflower crop to 6.88% for Jowar crop. Village Accountants have under reported high yielding variety in case Tur during Kharif and other crops during Kharif and summer seasons. Districtwise, cropwise details are given in Annexure – 6.

2.13 Discrepancies noticed in recording crop variety particulars:

Discrepancies noticed in recording crop variety particulars of crops are given in Table-10.

	Total	0	0	272	5	0	1	3	5577	26
				(5)				(99)	(1)	(100)

It is observed from the above table that, the crop variety particulars reported by the Supervisors and Village Accountants is almost matching in 98% cases during Kharif and 99% cases during Rabi and Summer seasons respectively.

2.14. Response in page totaling of RTC (Schedule AS 1.1):

The schedule AS 1.1 is designed to study the discrepancies in the area figures reported for village accountants under the crops /crop mixtures. Supervisors have to record of the crop area as under.

- (i) As recorded by the Village Accountant in the RTC
- (ii) As reported by the Village Accountant in TRS statements/crop abstracts
- (iii) As observed by the Supervisor,

For checking the figures of RTC/crop abstracts/TRS statements reported by the Village Accountant for that villages as a whole, the supervisor has to arrive at page-by-page totals for all the survey/sub- survey number of the village for all the three seasons separately. The percentage of receipt of schedules AS 1.1 by cut off date for kharif, rabi and summer were 84%, 89% and 97% respectively. The percentage response for schedule AS 1.1 for kharif & rabi and summer was 100% during the reporting year.

2.15. Discrepancies in page totaling of RTC register:

The page totaling by the supervisor, verified with that of the Village Accountant is given in Table-11.

Table – 11
Discrepancies observed in page totaling of village register
During the years 2010-11and 2011-12

Sl. No.	Season / Crop	Number and percentage of sample villages classified as per errors where in the crop area aggregated by supervisors and reported by Village Accountants differed			
		2010-11		2011-12

2.	Wheat	126	23(18)	133	18(14)
3.	Bengalgram	138	26(19)	152	29(19)
4	Sunflower	98	13(13)	106	4(4)
	Total	512	89(18)	548	79(14)
III.	SUMMER				
1.	Paddy	54	0(0)	54	0(0)
2.	Groundnut	104	2(2)	104	2(2)
	Total	158	2(1)	158	2(1)

The above table reveals the percentage of villages in which area of crops as aggregated by supervisors and as reported by the VA differed. The page totaling differed in 9, 14 and 1% of villages during kharif, rabi and summer seasons respectively. This is to be addressed properly on priority to rectify this type of differences. Districtwise, cropwise details are given in Annexure-7.

2.16. Discrepancies noticed in aggregation of crop area at village level:

Discrepancies noticed in cropped area as per the Supervisors and Village Accountants are given in Table-12.

Table - 12
Discrepancies noticed in aggregation of crop area at village level
During the years 2010-11 and 2011-12 (as observed in sample villages)

Sl No	Season / Crop	2010-11				Area in Hectares

4	Sunflower	5516	5541	0.45	8203	8210	0.08	
	Total	49935	49759	-0.35	60350	60343	-0.01	
III.	SUMMER							
1.	Paddy	5790	5790	0	5790	5790	0.00	
2.	Groundnut	3525	3525	0	3525	3525	0.00	
3	Total	9315	9315	0	9315	9315	0.00	

The Table-12 gives the impact of discrepancies in cropwise aggregation of area at village level as observed by the supervisors during the course of sample checks. The above table reveals the fact that the cropped area as totaled by Supervisors were on higher side compared to area totalled and reported by Village Accountants in respect of all crops except Paddy, Jowar, Bajra, Maize, Groundnut and

greengram crops in Kharif, wheat, bengalgram and Sunflower during Rabi season. Districtwise details are given in Annexure-8.

3 DETAILS ON YIELD STATISTICS (AS 2.0):

3.1. The average yield rate for 28 principal food and non-food crops grown in the State are estimated on the basis of data obtained by conducting crop-cutting experiments under Crop Estimation Survey (CES), adopting stratified Random Sampling Procedure. The experiments were conducted by the primary workers from Revenue, Rural development and Agriculture and Horticulture Departments. Sample checks on CES under ICS scheme are carried out in a sub sample of CES villages by the central and state agencies with a view to assess the extent to which the methodology, techniques and procedures prescribed for the conduct of crop cutting experiments are adopted and practiced in the real field conditions.

3.2. Crop Estimation Survey (CES):

The details of number of crop cutting experiments planned, conducted under Crop Estimation Survey for kharif, rabi and summer crops during 2011-12 are given in Table- 13.

Table – 13
Details of crop cutting experiments during 2011-12

Season	Number of experiments		
	Planned	Conducted	Percentage
Kharif	53960	51917	96%
Rabi	26502	25037	95%
Summer	7558	7119	94%
Total	88020	84073	96%

It is seen from the above table that, out of 53960, 26502 and 7558 experiments planned during kharif, rabi and summer seasons, 51917, 25037 and 7119 experiments were conducted respectively, which correspondingly works out to 96% in kharif, 95% in rabi and 94% in summer seasons. Thus, out of 88020 experiments planned, in total 84073 (96%) experiments were conducted. Cropwise detailed information regarding experiments planned, conducted, yield rate and percentage of standard error are given in Annexure – 9.

3.3 Training of primary workers under CES:

Conduct of crop cutting experiments as per the procedure and reporting of reliable data plays a vital role in arriving at crop yield estimates. As such training of Primary workers and Supervisory officers is an intrinsic programme under the survey. The details of training imparted during reporting and previous years to the primary workers by the District Statistical Officers are as follows.

Table - 14
Details of number of training sessions conducted, primary workers drafted and attended.

Agency	2010-11			2011-12		
	No. of CES Training sessions Conducted	Total no. of primary workers		No. of CES Training sessions Conducted	Total no. of primary workers	
		Drafted	Trained		Drafted	Trained
Revenue	170	5595	4734	85	170	4616
Agriculture	167	3454	2634	76	167	2598
Rural Development	163	3310	2724	82	163	2742
Statistical	-	-	-	-	-	-
Total	500	12359	10092	82	500	9956
						8135
						82

It is seen from the above table that, the CES training was arranged in 500 sessions to all the agencies concerned during 2011-12 in which 9956 primary workers were drafted and 8135 attended the training. The percentage of attendance was 87% by the Revenue and 77 % by the Agriculture and Rural Development.

3.4. Supervision of field work under CES:

Supervision of crop cutting experiments is an integral part of Survey to check whether the prescribed procedures and techniques were followed by the primary workers. 15% of the experiments on each crop are required to be supervised by the State statistical agency and 10% each by Agriculture and Revenue Departments. The details of supervision by each agency during 2010-11 and 2011-12 are given in Table - 15.

Table -15
Supervision of experiments under General Crop Estimation Survey
during 2010-11 and 2011-12

Year/ Season	Statistical agency					Other agency				
	No. of expts. to be super vised	No. of expts. super vised at all stages	Percen tage	No. of expts. super vised at harvest stages	Percen tage	No. of expts. to be super vised	No. of expts. super vised at all stages	Percen tage	No. of expts. super vised at harvest stages	Percen Tage
2010- 11										
Kharif	10480	8664	83	8548	82	14190	10482	74	10446	74
Rabi	5410	4778	88	4766	88	6580	5486	83	5486	83
Summer	1580	1350	85	1346	85	2190	1728	79	1728	79
Annual	216	182	84	182	84	252	210	83	210	83
2011- 12										
Kharif	7370	7072	96	6930	94	10036	9523	95	9372	93
Rabi	2510	2417	96	2410	96	3464	3388	98	3338	96
Summer	870	853	98	850	98	1354	1339	99	1339	99
Annual	134	133	99	133	99	202	198	98	198	100

The percentage response for supervision by harvest stage other agencies were higher than that of statistical agency during Summer and annual seasons and lower during Kharif season during the year 2011-12. The experiments supervised by the staff of National Sample Survey Organisation under the scheme of Improvement of Crop Statistics have also been included in the statement.

3.5. Findings of yield data under the Improvement of Crop Statistics:

Sample checks are conducted both by the Central and State agencies independently on equal matching basis with a view to improve the quality of fieldwork and to minimise the deficiencies and to suggest remedial measures for the lapses if any. The number of experiments allotted for supervision under ICS during Kharif, Rabi and summer seasons were 620, 200, 80 experiments respectively for both Central and State agencies separately.

Seasonwise number of experiments planned and supervised at various stages under ICS during 2010-11 and 2011-12 is presented in Table – 16.

Table - 16
Supervision of experiments under Improvement of Crop
Statistics during 2010-11 & 2011-12 State Agency

Year/ Season	No. of expts. planned for supervision	Supervised at		No. of expts. lost	Not supervised
		Harvest stage	Post harvest stage		
2010-11					
Kharif	620	602	6	12	-
Rabi	200	196	-	4	-
Summer	80	80	-	-	-
2011-12					
Kharif	620	618	-	2	-
Rabi	200	198	-	2	-
Summer	80	76	-	4	-

Out of 620, 200 and 80 experiments planned for supervision during kharif, rabi and summer seasons of 2011-12, the number of experiments supervised were 618, 198 and 76 respectively at harvest stage itself. Seasonwise and cropwise details of supervision of crop cutting experiments by state agency under ICS are given in Annexure-10.

3.6 Procedural deviations and discrepancies:

Deviations in procedure of conduct of crop cutting experiments observed during the sample check are presented in Annexure - 11. It is seen that 98%, 96%, and 100% of experiments conducted during kharif, rabi and summer seasons respectively for the year 2011-12 were free from procedural lapses. The corresponding figures for 2010-11 was 98%, 98%, and 96%, respectively. The District Statistical Officers were instructed to take suitable action to ensure the conduct of crop cutting experiments 100% free from any procedural lapses.

3.7. Estimates of yield rate under ICS and CES:

Estimates of yield rate for important crops under ICS and CES along with percentage of sampling errors worked out during 2010-11 and 2011-12 are presented in Annexure - 12. The yield rate & its percentage of standard error under ICS in case of State Samples published by Government of India for the year 2011-12 have been included in column 8 & 9 of Annexure 12 respectively.

ANNEXURE -1

Details on timeliness in completion of TRS area enumeration (no.of villages) during the years 2010-11 & 2011-12

Year/ Season	Number of villages where area enumeration was completed					Maintenance of Records	
	In time	Late	Date of completion not known	Partially completed or not completed	Total	Latest forms used	Records kept in regular forms
1	2	3	4	5	6	7	8
<u>2010-11</u>
